

Luna Borgo

Staff Designer | Design Systems · Product | Heineken · Adidas | Amsterdam

lunaborgo@gmail.com | linkedin.com/in/lunaborgo | lunaborgo.com | Amsterdam, NL – Right to work in the Netherlands, no sponsorship needed | +31 622603609

Designer with 12+ years of experience across agencies, global brands and freelance. I've had the pleasure of working with design in many ways and my experience ranges from interaction design, systems and apps to AI automations and strategy.

Most recently at Heineken, I brought in the service blueprint that made the need for Eazle, one global B2B platform replacing 40+ regional ones, visible. I then built its design system, Crate, from the start, including an AI design-to-code pipeline that shipped into production.

I'm fluid between strategy and craft: I solve hard problems, make the solutions beautiful, and make sure what we envision is what we actually deliver. I elevate brand, product and the teams that build it.

I started designing for fun around 2005 and I still love every minute of it.

CORE COMPETENCIES

Product – UX Strategy · Service Design · Product Discovery · Experimentation · Interaction Design · Accessibility · Localisation · Visual & Brand Design

Systems & AI – Design Systems · Semantic Token Architecture · Component Libraries · Figma & Figma MCP · AI Design-to-Code Automation · AI Engineering

Leadership – Stakeholder Management · Change Management · Community Building · Pitching & Storytelling · Facilitation · Coaching

WORK EXPERIENCE

THE HEINEKEN COMPANY

Staff Designer, Design Systems | June 2023 – Present / Senior Product Designer | August 2022 – June 2024

eazle is Heineken's global B2B platform connecting outlets, distributors and sales advisors, built to replace up to 120 versions of the same journey across 40 markets. I joined as its product designer, then became founding member and most senior designer of Crate, its design system.

- Shaped eazle's product vision and presented it to marketing leads, product directors and regional managers; led design discovery and stakeholder alignment for core ordering flows across product, engineering, and commercial teams in multiple markets

- Brought in the service blueprint, first uniting leads from each customer area to gather input, build buy-in and show what it connects; it's still core to the design process and kept up to date
- Set up design token architecture (Core, Semantic, Modes), component foundations, and federated contribution infrastructure for a 6-person core team supporting 235 community members
- Designed and shipped an AI design-to-code pipeline into the production component library, turning Figma components into specs, Jira tickets and Storybook stories via Figma MCP; Built AI-powered Figma token spellchecker, still used to prevent errors
- Translated eazle rebrand into structured digital principles, introducing the Brand Volume framework for brand expression across product and marketing; rolled out with 100% adoption in 3 months and zero disruption
- Formalised contribution workflows (Jira-Figma integration, Definition of Done, review model) with 85% response rate across 67 design reviews in under 10 months
- Improved component health from 55% to 94% in 6 months, measured across code, design and documentation
- Drove voluntary adoption by 3 Heineken OpCos, some before they had Eazle, and 230% community engagement growth
- Established Design Jam as a quarterly organisation-wide innovation practice
- Prepared and set up the team's move to Heineken's new digital hub in Kraków

ADIDAS

Product Designer | May 2021 - Jul 2022

Led product recommendation strategy for adidas.com, shifting from fragmented experiments to a structured, scalable framework. Worked in a horizontal team on end-to-end journeys, where most designers owned a single page.

- Ran cross-functional discovery using Opportunity Solution Trees and stakeholder alignment workshops; used a low-effort experiment to shift roadmap priorities towards a bigger bet
- Redesigned key product recommendation flows on adidas.com, building on earlier experiments that had not landed, increasing average order value
- Partnered with adidas Design System team to consolidate 10+ inconsistent carousel implementations into one modular component supporting 36+ configurations
- Defined shared recommendation decision approach aligning placement, logic, and editorial inputs across the full customer journey, replacing fragmented squad-by-squad rules

HCL TECHNOLOGIES (AEGON)

Interaction Designer, Aegon | May 2018 – May 2021

Product designer for Aegon Bank and founding member of the Design System team.

- Interaction designer on Aegon digital banking and financial services, pensions, insurance, and investment journeys across web and mobile
- Translated refreshed brand into reusable components, patterns, and usage guidance for consistent product delivery
- Defined designer and partner contribution model for design system evolution in day-to-day delivery, not only documentation
- Delivered UX for regulated flows including KYC and banking portal renewal; maintained continuity through acquisition and organisational restructuring

EARLIER EXPERIENCE

Led end-to-end UX/UI and brand projects across agency, freelance, and in-house environments. Built reusable UI kits to improve onboarding and developer collaboration, forming the foundation of my systems-oriented approach now applied at enterprise scale.

Atabix

UX/UI Designer | 2017 - 2018

Tech agency building SaaS for government and web products for clients such as Gassan and Primephonic. Led the design work and mentored a junior designer; my first role in the Netherlands.

Único Agência Digital

Graphic & Digital Designer | 2014-2016

Leading digital and marketing agency in Vitória. Designed SEO-focused websites for nightlife, retail and fashion brands, often a new one every one to two weeks, plus the CMS portal clients received with their sites. Already building component libraries in Photoshop.

Freelance

Designer | Alongside agency roles

Websites, branding, UI kits and apps for clients in Brazil and abroad, including a healthcare app (WeCancer) and WordPress templates.

Resultate

Graphic & Digital Designer | 2013-2014

Graphic, brand and web design, from blogs to e-commerce on platforms like Salesforce, which got me used to designing within platform constraints.

Midia in Bus

Graphic Designer | 2012

Transit advertising campaigns and brochures.
